DEMONSTRATION RECORD - All details below are fictitious and generated for the PharmAware demo. Do not use for clinical decisions.

Patient Details

Name	Margaret Thompson	**Patient ID**	P0001
Date of birth	01 Jan 1943 (83 yrs)	**Sex**	Female
Smoking	Never smoked	**Allergies**	**Penicillin**
Last med review	01 Jan 2025	**Portal login**	P0001 / Patient1!

Clinical Measurements

Measure	Value	Reference / note
eGFR	88 mL/min/1.73m^2	Normal range >= 90; recorded alongside CKD stage 3 diagnosis
HbA1c	48 mmol/mol	At diagnostic threshold for T2DM (>= 48)
BMI	27.0 kg/m^2	Overweight (25.0 - 29.9)
Weight	68 kg	Recorded 15 Feb 2026

Long-Term Conditions

Code	Condition	Type
AF	Atrial fibrillation	Primary diagnosis
HF	Heart failure	Secondary
CKD3	Chronic kidney disease, stage 3	Secondary
T2DM	Type 2 diabetes mellitus	Secondary

Current Repeat Medications

Medication	Strength / form	Indication	Notes
Warfarin	3 mg tablets	AF - stroke prevention	INR monitoring required
Bisoprolol	5 mg tablets	AF rate control / HF	
Ramipril	5 mg capsules	HF / renal protection	Monitor U&E, potassium
Furosemide	40 mg tablets	HF - fluid overload	Monitor fluid status, U&E
Metformin	500 mg tablets	T2DM	Review dose against renal function
Atorvastatin	40 mg tablets	Cardiovascular prevention	

Acute medications: none recorded.

DEMO DATA

Latest Polypharmacy Risk Assessment

15 Feb 2026, 10:30 | Reviewed by dr.patel@nhs.net | Age 83, eGFR 88, weight 68 kg

OVERALL RISK SCORE	5.82 / 10	MODERATE

Domain	Score (0-10)	Domain	Score (0-10)
Fall risk	5.3 (Moderate)	QT prolongation	1.7 (Low)
Bleed risk	6.7 (High)	Frailty	4.5 (Moderate)
Anticholinergic burden (ACB)	0.3 (Low)	Renal risk	6.4 (High)

Per-Drug Risk Contribution

Drug	Fall	Bleed	ACB	QT	Frailty	Renal
Warfarin	1	3	0	0	1	1
Bisoprolol	1	0	0	0	0	1
Ramipril	1	0	0	0	0	2
Furosemide	2	0	0	1	1	2
Metformin	0	0	0	0	0	3
Atorvastatin	0	0	0	0	0	0

Scores per domain: 0 = none, 1 = low, 2 = moderate, 3 = high contribution.

Top Risk Drivers

Drug	Domain	Score	Suggested review point
Warfarin	Bleed	3 (High)	Check INR control and bleeding risk (e.g. HAS-BLED); consider DOAC suitability
Metformin	Renal	3 (High)	Confirm dose is appropriate for current renal function; sick-day guidance
Furosemide	Fall	2 (Moderate)	Assess postural hypotension and falls history

Assessment History

Date	Reviewer	Overall	Band	Fall	Bleed	ACB	QT	Frailty	Renal
15 Feb 2026	dr.patel@nhs.net	5.82	MODERATE	5.3	6.7	0.3	1.7	4.5	6.4
20 Sep 2025	pharmacist.jones@nhs.net	5.45	MODERATE	4.9	6.3	0.3	1.7	4.0	5.5

Trend: overall score up 0.37 since Sep 2025, driven mainly by renal (+0.9) and frailty (+0.5) domains.
